

An example of black sparkle bricks, as used on a QuietStone fire proof board

## PRODUCT OVERVIEW

**MONOLITH**  
BrickPlus: QuietStone

QuietStone fire proof lining featured in a Motorway tunnel

## MONOLITH

BrickPlus: QuietStone

### WHAT IS IT?

**BrickPlus: QuietStone** is a truly unique non-combustible brick slip system to meet modern day building requirements.

QuietStone fire board is a lightweight, cost effective carrier, superior to other alternatives on the market. It is water resistant, weather proof, durable and resistant to chemical or biological degradation.

QuietStone fire board is made from recycled

glass, ensuring it is one of the most fire resistant products on the market. This also means that it has a low carbon footprint and can contribute towards improving the sustainability of a project, increasing the BREEAM rating for new buildings.

Our non-combustible, lightweight fire board is an extremely high performance, fire rated carrier which can be used in conjunction with wall, ceiling, floor and doors systems.

### DID YOU KNOW?

**BrickPlus: QuietStone** has been developed with fireproofing as a core value. Fire protection is a valuable property required in a range of applications, from tunnel linings to marine engine rooms.

Contact us for more information.

### HOW DOES IT WORK?

As our commitment to leading edge innovation continues, we are really excited about adding another non-combustible product to our range.

Ideally suited to applications where non-combustibility is a key design concern, the product consists of a fire retardant expanded glass panel with Monolith **BrickPlus: Soloslips** adhered to the front, forming an incredibly strong cohesion.

The panels are available in a variety of thicknesses, and a wide range of popular brick styles are available to populate the front. Brick slips can be matched to existing or out of stock styles, or even created from scratch for a truly bespoke finish.

Panels are shaped to slot together easily for quick and simple installation, and are castellated for an invisible join. They are supplied unpointed and ready to be fitted.

### TECHNICAL INFORMATION

**Material:**

100% fire retardant recycled glass panel faced with high quality, composite mortar brick slips.

**Finish:**

Handmade texture and colour.

**Size and Weight:**

12 brick slips on a panel.  
Each panel: Height: 450mm, Width: 563mm.  
Panel weight: 5kg.

**Complimentary products:**

We also supply pistol corners, headers, reveals and individual brick slips to finish off your project.

### APPLICATIONS

Our products are class leading interior and exterior systems that are at home in domestic and commercial buildings.

- Most suited to areas where fireproofing and non-combustibility are key design factors.
- Suited to most applications.
- Suitable for internal and external usage.
- New builds.
- Renovation projects.
- ICF systems.
- Timber frame buildings.
- Masonry.
- SIPS.
- Steel frame construction.

Should you have any questions regarding applications - or any aspect of our products - please feel free to contact us. Details are on the back cover.

### BENEFITS

We aim to deliver all our products to the highest possible standard, and are proud to have built up a range of market-leading products for a variety of applications.

- 100% non combustible
- Easy to cut
- Fast to install
- Eco-friendly: made from recycled glass
- Huge range of brick slip styles
- Bespoke sizes possible
- Brick matching service
- Bespoke brick creation service

## BRICK MATCHING SERVICE

Need to match the existing brick for your project, but can't find any stock? Simply can't find the brick you are looking for? We offer a brick matching service

### WHAT IS IT?

Our **brick matching service** is here to help you match a brick colour, texture, pattern or finish. Perhaps your project needs bricks that just aren't manufactured any more, or you are having a problem in locating more stock, so you can finish your project.

Whatever the reason, our skilled craftsmen are on hand to help. Provide us with a sample, and we will do our best to match the brick for you, then apply it to QuietStone fire boards, ready for you to install.

## BESPOKE BRICK CREATION SERVICE

Don't follow the crowd - we never do!  
We can create unusual bricks in the usual brick slip format.

### WHAT IS IT?

Our **bespoke service** truly sets us apart.

Because we manufacture all our brick slips, we are not restricted to existing brick finishes. As a result, we can offer you something truly bespoke.

Just imagine what you could create if traditional brick colours were not a limitation! Think about colour, texture and finish – all key components in the creation of something new. Our bespoke service helps you realise that dream and make it a reality.
